

NCTS

THE ULTIMATE
THIN CLIENT
SOLUTION
WITH AMAZING
PERFORMANCE
ON GREEN
TECHNOLOGY
REVOLUTION

Compared to traditional PC, Thin Client can benefit enterprise users with higher IT management efficiency, productivity and lower IT cost. SMARTSTATION has a complete Thin Client product line for customers, including single display, multi-display and smart card application, moreover, all kinds of Thin Client are durable, quiet and with low power consumption, allowing enterprise users to reduce Total cost of Ownership effectively, SMARTSTATION Thin Client series are available with Smart Linux, Windows CE and Windows Embedded OS.

The SMARTSTATION Thin Client is the smallest, most advanced thin client on the market. It combines great performance, stateless operation, low power consumption, remote management and simple device setup and imaging. This small, lightweight, solid-state unit can be mounted on the back of monitor, making SMARTSTATION Thin Client ideal for any space-constrained environment.

SMARTSTATION is dedicated to be the professional thin client and embedded computing ODM provider for over 14 years and now we are one of the top independent manufacturer of thin client. With providing design, manufacturing and service support functions for embedded computing, SMARTSTATION is your best embedded solution partner to empower more efficiency and safety for your e-World.

Introduction

very low cost

easy to manage

ultra low power consumption

stable & reliable

better performance

fanless design

SMARTSTATION Thin Client Benefits

Green

Lower power consumption for energy saving and reduce CO2 for earth saving.

Our products focus on reducing, reusing and recycling materials used in our manufacturing operations.

Our environment compliance effort including ISO 9001:2008 Certification.

Economy

Lower power cost of ownership (TCO): Save more than 50% off cost than using traditional desktops for energy saving and maintenance cost saving.

Durable

Fanless design for long life span, noise free and higher system reliability. Our thin client components are used industrial level and solid parts for long lifespan.

Secure

Since the software becomes entirely confined to the servers, thin clients are protected from the use of unauthorized software or the introduction of viruses, Unlike PCs and traditional laptops, thin clients are locked down and offer greater security against theft, damage, malware, spyware and viruses.

Secure 

Eco Friendly 

Power Saver 

Maintenance Free 

Benefits

SMART CCCM Centralized Management

CCCM (Cinfin Cloud Client Management Software) supports multi-platform, multi-OS-type. Contains functions such as remote assistance, batch deployment, software dispatch, application upgrade etc. With unified management interface, to achieve centralized management and group management.

Unified management interface, adapt to centralized management and group management.

Provides unified management interface, user account, roles (administrator privileges), resources (cloud client) separated, to achieve centralized management and group management.

Standard protocol, fully management

The solution can manage various cloud clients with different OS (XPe/WES7/COS*). The solution defined a standard communication interface, which is convenient to manage cross-platform device.

Excellent user experience

While support instant upgrade, also support automatic upgrade while cloud client shutting down or Non-working time, ensure user not be interrupted while working.

network topology map

Note : Less than 3,000 units under management, no need to install Load Balancer and Secondary Management Server.

Management

SMART CCCM Centralized Management Functions

Function Item	Function description
System configuration	Remotely system configuration and software configuration could be set remotely, the common system configurations contain Display, Date and Time, System User, Network, Browser, Printer, Connection Item and other software configuration and template could be applied as well as application configuration could be set in batch.
Remote Assist	Issues could be solved by remote analysis ways : Remote monitoring, Screen shot, Instant Messaging etc.
Power Management	"Turn Off", Log Off", "Restart", "Wake up", could be done remotely and intelligently.
Message Management	Notification or message could be sent from administrator to single cloud client or batch cloud client, and messages could be done instantly between client and server (windows).
File Deployment	Application installation package could be dispatched fastly and installed safely, and you can copy file to client, deploy operating system or upgrade patch.
Log Management	Record the time, content and result of the operation by administrator. It is convenient for administrator to track in the future.
Device Security	Disable or enable peripherals.

Management

NCTS

Processor	CPU	INTEL ATOM D2500 1.86 Ghz DC
Memory	RAM	2 GB
Storage	SSD	8 GB (Expandable)
I/O Peripheral Support	Parallel	x1
	Serial	x1
	Keyboard & Mouse	PS/2
	USB	x4
Networking	LAN	x1 (10/100/1000Mbps Base-T Fast Ethernet RJ-45)
	Wireless	(optional) Built-in Support 802 11b/g/n protocol
Display Support	Resolution	VGA up to 1280x1024, 1440x900 (wideScr)
Audio	Line-out	-Output x 1 (line-out)
	Mic-in	-Input x1 (line-in/microphone)
Physical Characteristics	Dimension	186mm(L) x 210mm(W) x 58mm(H)
	Weight	0.44Kg
Power	Adapter	60W
	Consumption	25W
Environment	Operation Temperature	0 C - 40 C
	Relative Humidity	30% to 90% non-condensing
Electrical Values	voltage range	100 V - 240 V (AC Input)
	frequency range	50 Hz - 60 Hz
SMART COS		MS RDP Citrix ICA, VMwar view (RDP) browser, VNC viewer, Print support for Local printer (e.g. Deskjet and Laserjet Redirected mode)
VDI support		Microsoft windows Terminal Server 2003, 2008 & 2012 Citrix ICA / VDI-in-a-Box (RDP)VMware
Set-up and configuration		Boot from local Flash
		User interface language U.S English Keyboard Language support U S English Standard German French Italian and 30 Others included
Management		Remote management configuration and upgrade through CCCM power control, remote configuration, remote monitoring, system/patch deployment, security management, etc.
